La
FRENCH TECH

|| What is « *La French Tech* »?

« **La French Tech** »

It's the French startup initiative. A unique ecosystem gathering startups, investors, decision makers, investors, and community builders

Our mission

Make France one of the most attractive countries for startups, conquer new markets and build a meaningful future

|| Startup & scaleup ?

Startup

Young company that develops an innovative product or service integrating a technological or digital dimension. Less than 12 employees and a real desire for rapid and international growth.

Scaleup

Companies less than 20 years old in hypergrowth having already 12 employees, and 500 K€ of turnover per year or having raised at least 1M€ of cumulated fund raising since its creation.

Innovation and governance

II Administration

Scaleup

Ecosystem

II Gender equality

A tribune co-signed by the former presidency

To act effectively, our members voted unanimously in June 2019 to adopt new rules that include parity as a prerequisite in our new governance structure. This conveys to the entire ecosystem a desire to take concrete action in favor of parity

MÉTROPOLE DE LYON

|| DeepTech Commission

It aims to strengthen the links between the academic sphere and start-ups to increase the creation of DeepTech start-ups and strengthen France's global competitiveness in this field.

Its objectives are multiple: to transfer talents towards better employability of student-researchers in startups, to transfer technology from laboratories to startups (the "DeepTech" as a lever for growth), to infuse more engineering and funding from startups to laboratories to reinvent the way research is done in France.
